-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

1. The abstract of the disclosure is objected to because legal phraseology such as "This invention provides..." and "In accordance with the invention..." should be avoided. Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 10 recites "a liquid rimstick dispenser when adapted according to claim 1". Such limitation renders the claim indefinite in that it fails to point out what is included or excluded by the claim language. In other words, the scope of claim 10 could not be ascertained.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3751

5. Claims 1-13, as presently and best understood, are rejected under 35

U.S.C. 102(e) as being anticipated by Wilson et al. (2002/0148036).

Regarding claims 11-13, the Wilson et al. reference discloses a refill unit for a liquid rimstick dispenser. The dispenser includes a reservoir (112) for liquid active substance, and a flow controller (at 130, 134, 136) constructed and arranged to provide a mounting base for the reservoir and to dispense a dose of the active substance from the reservoir when a toilet to which the dispenser is fitted, is flushed, the reservoir having an outlet neck (about 120) to enable engagement with the flow controller. The dispenser includes a source of further active substance (at 128, 132, 139, 144), the source of further active substance being located about the outlet neck of the reservoir (Fig. 12) and being constructed and arranged from simultaneous mounting with the reservoir on the flow controller, wherein the source of further active substance includes a tray-like member (about 132) in which the further active substance is located, and wherein the tray-like member is configured to provide an interference fit with the outlet neck (Fig. 12).

Regarding claims 1-10, the method as claimed would be inherent during the normal use and operation of the Wilson et al. dispenser.

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
